

## Designer style

*Careful planning and an expert designer eye combine to create an outdoor living area that seamlessly merges alfresco dining with a luxurious pool*

Frameless glass around the pool enhances the uninterrupted vista

**N**ot only did Design Pools successfully create this pool and outdoor living area, the company also undertook the complete home renovation. The result is a project that clearly demonstrates Design Pools' devotion to the construction of high-quality pools and landscapes that cater to clients' everyday needs.

By incorporating an alfresco into the design, the company maximised room for the pool and provided shade around the dining area to ensure the space can be used all year round.

The elevated alfresco features an outdoor kitchen complete with barbecue, sink and drinks fridge. The alfresco offers an unimpeded view of the pool, allowing adults to supervise children, while at the same time, providing a perfect outlook of the entire yard. Glass fencing surrounding the pool not only fulfils safety requirements, but also enhances the uninterrupted vista.

Completing the impressive aesthetic, Design Pools laid travertine paving throughout the alfresco and around the pool. The striking light colour of the tiles complements the pool's blue interior, ensuring it's the focal point of the backyard.

The clean layout and cohesive aesthetic demonstrates Design Pools' skills in creating not only sophisticated outdoor living areas, but also building exceptional pools and constructing the finest landscapes.
